Introduction

Developer profile. My skills include AS2, OOP, PHP, MySQL and lately some Flex and AS3.

Interested in web standards, usability, accessibility, Open Source tools for Flash development (MTASC, SWFMill, Red5, haXe, etc) and all kinds of technologies involving web or multimedia.

On most projects my responsibilities were architecture definition, coding, briefing and defining requirements with clients.

Working experience

- Currently working as freelance

- January 2006 – June 2008

Senior Flash Developer at [CTAD](#), Cambridge, UK. Development of data-driven e-learning applications including projects on mobile devices such as PDAs, PSP, etc. Leading developer of an AS2 framework.

- August 2003 – December 2005

Senior Flash Developer at [Vector Software Factory](#). Development of dynamic websites, building components, Flash Remoting (AMF PHP), Flex, definition and development of architectures for full Flash sites.

- February 2003 - August 2003

Continuation as freelance of projects for Bitamina.

- February 2002 - February 2003

Foundation of Bitamina Interactiva. 100% responsible of web and multimedia department. Development of websites with dynamic ActionScript, PHP and MySQL.

- October 2000 - January 2002

[Grupo Leben](#) B2B marketing. Member of multimedia department.

Projects

Zcode

ZCode is my own code repository. A lot of Flash (AS3, AS2 and some Flex), some PHP and haXe. Keep in mind that this is mainly for my *personal* use. I mean, might not be as tidy as it should!

HippoHX

HippoHX is a tool to create Flash desktop applications. Similar to AIR but based on haXe and SWHX. Still in early development, but you can give it a go:

<http://hippohx.com>

ZLog

ZLog is an extremely lightweight log system for Flash. It goes better with MTASC, but you can still use it from the IDE.
