Introduction

Developer profile. My skills include AS2, OOP, PHP, MySQL and lately AS3 and some Flex.

Interested in web standards, usability, accessibility, Open Source tools for Flash development (MTASC, SWFMill, Red5, haXe, etc) and all kind of technologies involving web or multimedia.

In most projects my responsibilities were architecture definition, coding, documenting when necessary and defining requirements with clients.

I run a technical and a personal blog (in Spanish), occasionally I give Flash related talks such as Source Control for Flash developers at LFPUG, plus I'm forum moderator at Domestika, FlashLa and After Hours.

Working experience

Currently working as freelance

January 2006 – June 2008

Senior Flash Developer at Tribal CTAD, Cambridge, UK. Development of data-driven e-learning applications including projects on mobile devices such as PDAs, PSPs, etc. Leading developer of in-house AS2 framework.

August 2003 – December 2005

Senior Flash Developer at Vector Software Factory. Development of dynamic websites, building components, Flash Remoting (AMFPHP), Flex, definition and development of architectures for full Flash sites.

February 2003 - August 2003

Continuation as freelance of Bitamina's projects.

February 2002 - February 2003

Foundation of Bitamina Interactiva. 100% responsible of web and multimedia department. Development of websites with dynamic ActionScript, PHP and MySQL.

October 2000 - January 2002

Grupo Leben, B2B marketing. Member of multimedia department.

Projects

HippoHX

HippoHX is an Open Source tool to create Flash desktop applications. Similar to AIR but based on haXe and SWHX. Still in early development, but you can give it a go:

http://hippohx.com

Zcode

ZCode is my own code repository. A lot of Flash (AS3, AS2 and some Flex), some PHP and haXe. Keep in mind that this is mainly for my *personal* use. I mean, might not be as tidy as it should!

http://zarate.tv/projects/zcode/

ZLog

ZLog is an extremely lightweight log system for Flash. It goes better with MTASC, but you can still use it from the IDE.
